Massachusetts Death Certificates Show Excess Mortality Could Be Linked to COVID Vaccines

After analyzing more than seven years of Massachusetts death certificates, independent investigator John Beaudoin, Sr., uncovered evidence that thousands of deaths in 2021 may have been linked to COVID-19 vaccines.

In this article, I highlight the work of independent investigator John Beaudoin, Sr., who analyzed nearly seven years of Massachusetts death certificates he obtained through a Freedom of Information Act (FOIA) request.

Beaudoin's findings demonstrate that the COVID-19 death toll in Massachusetts was largely confined to a short window of time in 2020, and that COVID-19 deaths in 2020 resulted from pulmonary causes — in contrast to COVID-19 deaths in 2021, which were more closely linked to illnesses of the heart and blood.

There is no reasonable way to explain how SARS-CoV-2 dramatically changed the way it attacks and kills human beings and why it did so at precisely the time the experimental mRNA inoculations were deployed.

Beaudoin's analysis also suggests that medical fraud and negligence may have been in play on a scale yet to be definitively determined.

Massachusetts: a center of COVID controversy

Beaudoin is a fellow resident of Massachusetts. Just down the road from us sit some of the most renowned hospitals and centers for medical research. None seem interested in validating or refuting the devastating implications of Beaudoin's findings.

Boston was home to the infamous Biogen conference held in March 2020. The event was considered to be one of the first "super spreader events" in the country.

In the summer of 2021, an outbreak of COVID-19 in Massachusetts' Barnstable County forced the Centers for Disease Control and Prevention to acknowledge that the injectable mRNA therapies were worthless.

When all was said and done, the vaccinated comprised a larger percentage of those who contracted COVID-19 than you would expect from a random sample of the county's residents.

Of those who were hospitalized in this outbreak, 80% were fully vaccinated. The "vaccines" offered no protection against severe disease.

In other words, there was no evidence that the vaccine offered any protection against infection.

Furthermore, vaccination status had no bearing on the viral load of those who got sick. Because viral load is correlated with infectiousness, the vaccine did not offer any reduction in transmissibility.

In one of its first real-world tests, the rapidly developed, tested and deployed therapy failed completely on all counts.

Massachusetts researchers can't seem to move on from mask mandates

Earlier this month, a study published in the New England Journal of Medicine (NEJM) found there was an increase in COVID-19 cases in Massachusetts school districts that lifted their mask mandates.

The authors of the study were researchers from the Boston Public Health Commission and venerated, local academic institutions in Boston (Harvard T.H. Chan School of Public Health, Department of Epidemiology, School of Public Health, Boston University, the Division of Infectious Diseases, Massachusetts General Hospital and Brigham and Women's Hospital and Harvard Medical School).

According to the authors, school districts with mask mandates had 39.9 fewer cases per 1,000 students over a 15-week period.

I wish to pose a simple question to the dutiful scientists down the road: so what?

Although districts that continued to enforce mask mandates after the statewide mandate was dropped had a lower COVID-19 incidence rate, mask mandates did not eliminate the transmission of the disease. Those districts still had 60 cases per 1,000 students.

The NEJM authors also proved that COVID-19 is transmissible whether or not masking precautions are implemented.

Children are going to get COVID-19 whether they are forced to wear a mask or not. There is no longer a need to "flatten the curve" until a miracle "vaccine" can be developed at "warp speed."

COVID-19 is a disease that will be with us for the foreseeable future. What is the point of such a study? To convince Massachusetts residents that a modest decrease in school days missed is worth the imposition of perpetual mask mandates upon their children?

The 'Big Story' in Massachusetts

While the NEJM researchers were busy tabulating COVID-19 infection rates in different school districts during the first part of 2022, a far more important story was unfolding in Massachusetts.

Through a FOIA request made to the state's department of public records, Beaudoin, an electrical engineer, obtained access to every death certificate in the state of Massachusetts between 2015 and September 2022.

His investigation into these records paints a disquieting picture of how the COVID-19 "vaccine" likely devastated the health of Massachusetts residents.

Beaudoin's analysis is detailed and rigorous and stands as an example of why a medical degree or an academic appointment is not required to uncover explosive evidence.

In fact, those kinds of credentials can often be impediments rather than assets. There is no excuse why the Massachusetts Department of Public Health has not done the analysis Beaudoin chose to do himself.

For the purposes of this article, I will focus on the summary points. A deeper dive can be found on Mathew Crawford's "Rounding The Earth" podcast or in Beaudoin's own Substack, which he writes under the name "Coquin de Chien."

Below is a plot of the raw numbers of daily deaths (confirmed by death certificates) over time for the years 2015-2021 overlayed:

Image credit: John Beaudoin, Sr.

The takeaway is impossible to miss. The rise and fall of daily deaths over a 10-week period in the early-to-late spring of 2020 is representative of a non-immune population encountering an infectious and virulent pathogen for the first time. This bump in the black line was from the casualties of the first wave of SARS-CoV-2 infections in Massachusetts.

Whether or not the state was still in the throes of a pandemic emergency beyond the first few weeks of June 2020 is debatable because it is quite clear that daily deaths quickly returned to baseline and stayed there until the autumn — when a far less lethal second wave hit the state. Recall that Emergency Use Authorization (EUA) stipulates that a public emergency is required before any mitigating therapy can obtain EUA.

The rapid rise and fall of deaths in Massachusetts in early 2020 is unmistakable, but who died? Beaudoin answers this question here:

Image credit: John Beaudoin, Sr.

This graphic visualization technique is called a heat map. Each cell in the array represents the deviation from the expected number of deaths in specific age groups at a specific time in 2020, based on values from 2015-2019. The deeper the red, the greater the difference is over expected levels. The deeper the blue, the lower the difference.

The majority of the casualties were confined to the elderly (65 and older) over a 10-week period. This is represented by the deep red cells in ages over 65 starting April 1.

Contrary to the endless deluge of news reports that suggested otherwise, official death certificates indicate the pandemic in Massachusetts was short-lived and affected only the most vulnerable.

Beaudoin gives us the equivalent heat map for the year 2021. Once again comparisons are made with the years 2015-2019:

Image credit: John Beaudoin, Sr.

The distribution of deaths in 2021 is remarkably different than in 2020:

- The short-lived and profound increase in deaths in the elderly in the spring of 2020 is not present in 2021. As mentioned above, the pandemic emergency was arguably over by the summer of 2020.
- There is a substantial and sustained (present throughout the year) increase in deaths in people ages 60 to 80 that is not present in 2020. What is causing or contributing to the excess deaths in this younger age group in 2021 that was not present in 2020?
- There is a substantial decrease in deaths in the eldest age group (85+).

The paradoxical drop in deaths in the most elderly (85+) is best explained by the substantial jump in deaths from the previous year in that age group. SARS-CoV-2 took the lives of the most elderly leaving a hardier group of octogenarians.

The increase in deaths throughout 2021 implicates the COVID-19 "vaccines" as a contributing factor (among others) for two reasons.

First, the pattern of deaths is not representative of an infectious agent that takes the lives of the vulnerable while leaving behind a population that is more robust and that is attaining natural immunity through exposure, i.e., what was seen in 2020.

Second — and most obvious — is that the "vaccines" were present in 2021 and not in 2020.

What is actually killing people in 2021?

The increase in all-cause mortality in 2021 in Massachusetts is reflected in other parts of the world. This concerning trend is often explained as solely the result of pandemic restrictions that prevented people from obtaining basic healthcare, cancer screenings, chemotherapy, etc.

This is where Beaudoin's Massachusetts findings go further. Here are some key points from his detailed analysis:

- Average age of all-cause deaths in 2021 was 75, which is significantly lower than the average for the years 2015-2019 (75.6) and even more so than in 2020 (76.2).
- 2021 saw an 8% jump in deaths from all causes compared to the average for the years 2015-2019, yet there was a substantial decrease in deaths attributed to COVID-19 compared to 2020. This could be explained by a vaccine that is partially effective in preventing COVID-19 deaths. However …
- 2021 saw the biggest jump in deaths from cardiac arrest compared to the previous year. Deaths from cardiac arrest in 2020 made up 16.62% of all deaths that year. In 2021, it was 18.63% of all deaths — or a 12.1% increase from 2020, which already had the greatest percentage of the previous five years.
- A similar jump in deaths from pulmonary emboli occurred in 2021 as well. Moreover, COVID-19 deaths that involved pulmonary emboli doubled in 2021 compared to 2020 and more than tripled in 2022.
- The proportion of COVID-19 deaths that involved cardiac arrest increased by 47.5% in 2021 compared to 2020 and 63.3% in 2022. Recall that Pfizer's six-month results demonstrated a four times greater risk of cardiac arrest in vaccinated participants than in those who received the placebo (Table S4).

According to information extracted from actual death certificates, COVID-19 apparently changed its way of killing people in 2021. Beaudoin accurately summarizes:

> "Viruses do not simply change how they kill from one year to the next. Something happened in C19-involved deaths after 2020 that changed how C19 purportedly kills people. Pneumonia and respiratory issues dominated 2020, the year of C19, but something insidious has doubled and tripled relative numbers of circulatory system deaths after 2020. The Massachusetts DPH cannot hide from this. Either there is massive fraud in coding of deaths or some intervention in 2021 and 2022 caused deaths or both are true at the same time."

Evidence of medical fraud?

In his dive into the 400,000 or so death certificates he obtained, Beaudoin showed there is also a high likelihood that some deaths are being inappropriately attributed to COVID-19 while others are linked to the vaccine but no mention of this appears on the certificate.

One such example involves the death of a 7-year-old girl in a town near my own. As Beaudoin has respectfully declined to mention the name of the child in his Substack, I will follow his example. Multiple news outlets covered this tragedy. All reported that she died from COVID-19.

Beaudoin was able to find her death certificate, which indeed states that she died from "Complications from COVID-19 viral infection."

But was her death certificate accurate?

He also found a report in the Vaccine Adverse Event Reporting System, or VAERS, of a complication from a second dose of the Pfizer formulation that was administered to a 7-year-old girl in Massachusetts.

Personal identification information does not appear on VAERS reports. However, the report indicates that this vaccine complication occurred just three days prior to the day of the death of the child who died of COVID-19:

Source: Vaccine Adverse Event Reporting System

Note that this VAERS report indicates the child previously experienced severe nausea and vomiting for 8-10 hours immediately following her first dose. After her second dose, for which this report was filed, her fever spiked to 103, she developed a severe stomachache and had not had a bowel movement for three days.

Is this the same child who purportedly died from COVID-19? If so, attributing the death to COVID-19 with no mention of the vaccine on her death certificate would constitute medical fraud — or at the very least, negligence on the part of the medical examiner.

Conspicuously missing from news reports covering this child's death was her vaccination status. Was this an oversight? If this young person who died from COVID-19 had not received the COVID-19 "vaccine" would this have been mentioned?

Notably, a different 7-year-old girl who died from COVID-19 made the news around the same time this year. This child was from Tennessee. People magazine covered her story, taking care to mention that she had not been inoculated.

People printed a quote from her doctor, a pediatric infectious disease expert, who told Good Morning America:

> "This is not something to mess around with. The takeaway for parents is this is a virus that we have got to take very seriously and one we have a safe and effective vaccine for."

Media coverage rarely misses an opportunity to laud the vaccines' benefits and warn of the danger of remaining unvaccinated. Simultaneously, any information that may implicate the COVID-19 "vaccines" when harm has occurred is categorically omitted.

Of course, without proof of this child's vaccination status, we can only speculate. This information exists on the Massachusetts Immunization Information System, which Beaudoin hopes he will eventually be able to access.

Questions for the medical establishment

How many deaths have occurred where the COVID-19 "vaccine" likely played a role but was not mentioned in official records?

How many deaths have been falsely attributed to COVID-19?

In March, health officials in Massachusetts eliminated nearly 4,000 (approximately 15%) COVID-19 deaths from their tally. Dr. Catherine Brown, a Massachusetts Department of Public Health epidemiologist said:

> "After a deep dive into our data and reviewing thousands of death certificates we recognize that this updated definition gives us a truer picture of mortality associated with COVID-19."

What prompted this "deep dive?" Was it news of Beaudoin's FOIA request and his investigation that was being picked up around the same time?

While researchers at prestigious institutions are trying to retrospectively determine whether face coverings may have prevented absenteeism in a handful of school districts, Massachusetts health officials continue to ignore enormous vaccine safety signals and evidence of medical fraud in their own state.

Official death certificates indicate that thousands of deaths in 2021 may have been linked to the COVID-19 vaccines. If they weren't linked to these products, why and how has the SARS-CoV-2 virus found a different way to kill people in 2021 and 2022?

Do these same signals appear in other states as well? How long will state departments of public health sit on their data before telling the public what that data show?

Updated: *This sentence was updated for clarity: When all was said and done, the vaccinated comprised a larger percentage of those who contracted COVID-19 than you would expect from a random sample of the county's residents.*

Just face it my friends, the so-called "vaccinations", and continual boosters are basically a BIO-WEAPON designed to depopulate this country, and the planet, and has been proven over and over....Wake up.

AGREED! Vaccines really are just a cash cow for Big Pharma. The Medical Industry does not study health or keep people heslthy. Its an Industry! Back in 400 BC theere was a Greek Physician by the name of Hippocrates. He is called the Father of Medicine. If these sham doctors followed his teachings...and taught people how to be healthy...the world would be far healthier - mentally and physically today. He advocated the use of the right foods...not drugs, vaccines or operations. The word doctor comes from the Latin word: docere....which means to teach. How many doctors today teach their patients ...how to stay well? Hippocrates was known for saying: Let FOOD be your MEDICINE; and MEDICINE be your FOOD! Putting any type of other matter directly into the bloodstream does not build immunity...it overwhelms the lymphatic system and destroys the human body!

I've been with a Boston area cardiologist for 15 years. When I was approached by him to take a new heart drug, I told him, and he's been a good and honest practitioner for me, that I had lost most of my respect for the medical profession. I acknowledged my gratitude for his care, but after consideration of his recommendation for the new drug, I said, "no thanks", nothing against you per se, but I'm just wrestling with the doubts I have for medicine. Until I do my study of the new drug and am convinced of it's superiority, sorry, can't just take the advice of Big Phat Pharma.

I have to concur; I had the greatest respect and confidence in my PCP until C19 broke out and I experienced his unmitigated refusal to prescribe the Hydroxychloroquine that I had requested when I thought that I had contracted the C-flu. Thinking back, I recalled his insistence on other "vaccines" and medications which my physical status barely suggested a need for.
I understand that this is how the medical community has been trained since Vexner (?) and that there is heavy pressure from multiple sources to comply but it leaves me, nevertheless, doubting their true efficacy in promoting health and their genuine concern for the well being of their patients as a priority.
11 ˄ | ˅ · Reply · Share ›

Beatrice → pmoses · 9 days ago
The doctors are well aware that patients have lost faith in them and their industry. I read comments by doctors all the time on Medscape that reveal how they feel. Granted there are many on there who hate patients, think we are morons and who refuse to admit any flaw in their perfect and godly system. I'm glad they are online showing their true colors because I wouldn't want them to doctor me for anything!

I hate that word, " Comply". My medical records show that I would not comply with my doctor's recommendation. All down the pages it says, ' Non-compliance.' It makes me feel like an antisocial felon and this is exactly how they intimate vulnerable patients into compliance. Compliance is also synonymous with regulations and so I feel like a thing that they want to regulate. Our medical system has been turned into a draconian surveillance system where patients are monitored for profitability, compliance and good citizenry.

Diane Kane → Beatrice · 6 days ago
Yes, Beatrice, the lack of recognition for the need for personalized medicine is a great failing of the medical community and it reeks of a lack of continuing education amongst practitioners. The most current immunological science is a complete mystery to these doctors. And it will be their achilles heel as the science continues to unfold. There is a group of people who were more vulnerable to severe Covid-19, and doctors have never tried to properly identify that cohort. Rather, they have implemented a one-size-fits-all, steamroller mRNA vaccine policy which is inherently unscientific.

I completely agree with you about the value of nutrition as medicine. I don't have insurance because it doesn't cover anything that is healthy for me and it doesn't provide safe and effective treatment by a safe and effective doctor. Over 20 years ago I buried myself in nutritional and orthomolecular research and armed myself with the knowledge to prevent and treat most any illness or symptom. A few years ago I had to be admitted to a hospital for tickborn infections and had to remain in treatment for several years but I found a doctor who specialized in Lyme, used acupuncture and a well designed protocol of plant tinctures that were extremely effective.

In 2005 I was told I had ovarian cancer but I refused any chemo, surgery or radiation. My doctor, a board certified practitioner of functional medicine told me that if was going to refuse any other treatment, the most important thing for me would be to do something that I had always wanted to do. So, I purchased a violin, got lessons and began playing with a small group every day. Within 6 months, I had no tumor, no pain or other symptoms. I later read several similar cases where cancer patients who had pursued the study of music were also cured. I won't tell anyone that music will cure cancer but I do agree with my doctor that it is important to believe in whatever path of treatment someone chooses and to pursue something that gives them pure joy like my violin did for me.

'BINGO' and 'DEMOCIDE!'
Democide is the murder of any person or people by their government, including genocide, politicide, and mass murder. Democide is not necessarily the elimination of entire cultural groups but rather groups within the country that the government feels need to be eradicated for political reasons and due to claimed future threats.

The so called covid19 virus did not did not cause any deaths at all. If you go back through the death data you will discover that the death rates were in the normal range until the lock downs were initiated. It was the lock downs that caused the initial spike in deaths. There was tremendous manipulation from government health officials to label as many deaths as they could as covid19 deaths to make people believe that this plandemic was real, It was in the beginning a fabrication to slow the demand for credit which was threatening to implode the world economy and to reduce the outflow of money by eliminating the elderly who could not tolerate being isolated. The jab was intended all along to reduce the general population. They are doing their best to cover it up, but many more people will see through the smoke and mirrors.

Sentinel → holisticpoet · 11 days ago

COVID was influenza, the virus that magically disappeared. Any rise in all-cause mortality and attributed to COVID is easily explained by Federally funded and controlled Hospital Protocols. But even with that going on the missing influenza deaths easily account for the total mortality figures.

5 ^ | v · Reply · Share ›

brbg → Sentinel · 9 days ago

When hospitals and doctors are paid thousands of dollars for each COVID death, guess what! All deaths have been labeled as COVID. The million number they say were from COVID are actually the number of all deaths from all causes.

Isthisthingon → brbg · 6 days ago

Yes, the CDC literally stepped out of their lane and changed the way Death was reported on Official Death Records with no Congressional oversite or Public Comment! This is how we know the Republicans are in on the Con because they didn't take the CDC to task for this key move .... if you had diabetes or any other disease, and you got the Flu or Pneumonia and died, your Death Certificate would list Diabetes or your Heart condition First on the Death Certificate and Flu or Pneumonia Second as your body couldn't recover from the Secondary Infection ... Then the slight-of-the-pen move made all that change .... now, if you "tested with a PCR and they declared you had Covid", even if you didn't have any symptoms - just a "positive test" you were then declared to be a "Covid" death - after they killed you with their "Covid Protocol"

Man jumps out of airplane without a parachute, and dies of Covid!

There was no excessive death or disease until the hospitals decided to let patients languish without care until they were too far gone to

Excellent point which continues to be ignored. My wife works in a large hospital in NC and they stopped counting all flu and flu related illnesses, (and deaths) as soon as covid made it's appearance... and even to this day, they very reluctantly acknowledge the flu... (except for a brief time this fall to push this seasons flu vaccine...) The death count from these vaccines will continue to rise until the world literally chokes on the truth. People are afraid, stupid, and opinionated, and will continue to line up for the shots. (Two nurses where my wife works actually gave up their religious exemption and got the vaccine, because, apparently, even God isn't as safe and effective as the covid vaccines.) P.S. Novant Hospital, (where my wife works) recieved so much, 'incentive money' from the covid scam they are now constructing a large addition to the hospital... even though they continue to keep parts of the existing hospital closed off because they refuse to hire nurses to staff those areas.)

chris · 11 days ago

Very good article with the essential info about the 'viral consequences' shifting from pulmonary to blood issues. I was also pointing to exactly that issue in my few substack posts... Just noticing there are few numerical errors in this summary here.
And one more thought about the 2020 'death wave' of the elderly between Apr and May. I remember Erin's talk here in CA capitol around June-July 2020 describing the killings in the elderly homes and hospitals...The ventilators, the drugs, the 'other issues' which play possibly here a role too.

18 ^ | v · Reply · Share ›

Heather Blackwell → chris · 11 days ago

Important to point out that humans died of pulmonary causes in 2020, because they were given remdesivir poison as the nationwide therapy protocol for Covid, which caused patients to drown in their own body fluids. Bryan Ardis discussed this.

We the American public all ready figured this out despite the propaganda to the contrary. Biden took the shot and booster and still got ccovid. That says it all c19 vaccine doesn't work. My aunt got the shot and dropped dead of a heart attack a few weeks later. We also knew in the beginning that vcovidwas bio warfare released on the world to purposely disrupt the presidential elections. We're not as stupid as most politicians believe.

11 ^ | v · Reply · Share ›

Leslie N → Hogback656 · 11 days ago

There is no way that Biden was given any shots, besides Saline. And people are getting sick because of all regular illnesses and now 5G. It's affecting their immune systems and then comes the body's reaction. Biden is an old man and old men get sick- just like in nursing homes.

4 ^ | v · Reply · Share ›

pharmerdavid → Leslie N · 10 days ago

Correct, they tell us he got "covidiocy" to keep the lie going that it exists, although it also makes the "vaccines" seem useless.

"a medical degree or an academic appointment" has in my experience been almost a guarantee of incapacity to analyze and model real world data. Kudos to Beaudoin for an excellent analysis of the data.

8 ^ | v · Reply · Share ›

BetterLuckNextTime · 11 days ago

This isn't the first case of medical fraud perpetuated by the government corporation or big pharma. They have been committing democide since their inception, controlled and funded by Rockefeller and the banking cartel.

Check out the book: Poison Needle by Eleanor McBean. The very fist jab ever deployed was for the "Spanish Flu", and all the injections given to troops going to WW1. Suddenly the war ends with too many troops sick, and then the first Plandemic commences called the "Spanish Flu".

The Death Cult Cabal has been the powers that be (TPTB), for a very long time.

7 ^ | v · Reply · Share ›

pharmerdavid → BetterLuckNextTime · 10 days ago

The "black plague" may have been biowarfare too, it exploded in cities all over Europe simultaneously, which is impossible, especially back then when people traveled slowly by horse and buggy.

After a jillion statistical exercises analyzing deaths, illnesses, etc etc, at this late date we still have doubts the vaccines are handmaidens to MURDER? Are you kidding? Africa has, on average, about a 6% vaccination rate for the "disease", countries with very high percentages of vaccinated losers have huge amounts of excess deaths. Hello, are you there? I see people adoring and canonizing Fauci. Insanity rules! Hello, are you there??

pharmerdavid → Regular Goy · 10 days ago

Pathetic people who believe the lies are the first to go, after gleefully taking the jabs, wearing masks, and testing testing testing themselves with a PCR test NOT testing for a virus (which doesn't exist). In the future those of us who knew better than to get jabbed will be forced to do it, or access to our own money will be turned-off, one of the reasons for the digital money push.

"How long will state departments of public health sit on their data before telling the public what that data show?" For as long as the WEF needs them to.

5 ^ | v · Reply · Share ›

Beatrice · 11 days ago

Dr. Drew interviews Ed Dowd who analyzes the data and explains it very clearly. Very concerning data.

The rise in all cause mortality in the 18-65 cohort of wealthier people who had corporate group health with a combined death benefit was much higher according to insurance companies than is indicated in this article. The first insurance company that made it public was a major firm based in Iowa and this cohort was 40% higher higher in 2021than in 2020. Other group insurers record even higher percentages. This is huge, something like 4 or 5 standard deviations. I have been listening to many Dowd interviews and he is right on the money. The fake vaccines are genocidal bioweapons and they are trying to cover it up with all sorts of gimmicks.

Beatrice → el Gallinazo · 10 days ago

It's very disturbing but it's even more disturbing that our own government and so called MSM is completely hush about it all. One of my neighbors is a retired Insurance broker and every so often I get his industry magazines in my mail. After reading several articles I realized that Big Insurance knows more about what's going on in the country relating to just about any topic...weather/climate, health, economics, etc.. and around the world than just about any other industry. Since then, I try to source info from insurance corps. I've been watching Dowd too.

Liberallez · 11 days ago

"How many deaths have been falsely attributed to COVID-19?"
The answer is "all of them" because "Covid-19" does not exist anywhere but in the propaganda aimed at subjugating and controlling the world population!!!
There is even serious scientific(!) argument that viruses themselves do not exist!!!
Dig and ye shall find!!!

3 ^ | v · Reply · Share ›

pharmerdavid → Liberallez · 10 days ago

Viruses have never been scientifically proven to exist. I say that as a layman who has watched dozens of videos by researchers explaining in detail how the "powers that shouldn't be" lie about the existence of viruses with no scientific proof.

''Massachusetts is Now California East!''
''Exclusive: Medical examiners, COVID, and Death Certificates''
In Massachusetts, the state Department of Public Health (DPH) asked medical examiners that if the person tested positive for the virus, to consider COVID as a cause of death.

''Possible motivation for the State to instruct medical examiners to commit fraud''
Why would a state department of public health instruct medical examiners do this? Two reasons:

To get federal funds for the state.
To encourage people to get the shots.

The death of the elderly vaxxed makes a lot of sense. Elderly people have compromised blood vessels. Now incorporate spike protein, and the lipid nano particles and that person has leaky blood vessels. This allows the mrna to leak into the major organs, causing the cells of that organ to make spike protein. Look at allbthe young people who got myocardial problems post vaccine. Lipid nano particles are designed to cross the blood brain barrier. They also disrupt the endothelial cells of the blood vessels. The myocardial problems in young people was due to the mrna programming the cells in their hearts to make spike protein. The immune system responds causing swelling and the heart lining separates leaving fluid in the heart lining. But wait, there is more. What happens when spike protein enters the brain? Nervous system problems, prion disease(CJD, misfolded proteins) Amyloidosis.

Deborah M. Damascus · 10 days ago

More and more I'm hearing of people with blood disorders, a 15 year old vaxed child with a blood clot in her liver - has never had Covid. She's got a 50/50 chance of not needing a liver transplant. And still, on his way out, Fauci is trying to scare people into taking that dangerous substance again. He should be brought up on charges of murder in my opinion. Early treatment is EVERYTHING - I see the FDA is trying to say they didn't obstruct the use of Ivermectin - well - someone better tell my FORMER internist who told me she wasn't willing to prescribe it and my NEW FORMER internist who told me she WASN'T ALLOWED to prescribe Ivermectin. Thank God for AFLD and Dr. Kory - I treated my family with the FLCCC protocol. and 10 of us got through it and have NO LONG HAUL. Sad to say people are still afraid to take one of the safest drugs out there and jab themselves instead with this lethal compound, whatever the heck it is.

IF A VAXED PERSON DIES WITHIN 14 DAYS AFTER VACCINATION, HE/SHE IS CONSIDERED UNVAXED AND IT MEANS UNPROTECTED FROM COVID.DIAGNOSE IS COVID, OF COURSE. REALLY? HOW TO PROVE?

The 2021 age stratified all cause mortality rates for vaccinated versus unvaccinated will reveal how safe and effective these mRNA "vaccines" actually were. If they were effective, we would expect lower death rates in the vaccinated. If they had no effect we will see no difference in rates. If they have a negative effect, we will see higher rates of death in the vaccinated, and it will be especially evident in the under 65 age cohorts, since there was such a high rate of mortality in the over 65 in 2020 due to COVID. Many of the 65 and over cohorts that could have been killed by the vaccines in 2021 were already eliminated in 2020 by the virus.

There were actually two pathophysiological methods of dying from blood clot induced immune response to spike protein: 1. The immune response to spike protein from the actual virus which infected the lungs and lead to massive clotting and loss of oxygen exchange, and 2: The immune induced clotting caused by the intracellular generation of spike protein created by the mRNA vaccines, which traveled through throughout the entire body. When the clotting induced by the vaccines was fatal, it was usually generated by: (A) spike protein formation within vascular endothelial cells supplying heart muscle and or the nerves that supply them, (B) spike protein formation within the vasculature supplying the central nervous system, or (C) spike protein formation within the endothelial cells lining the lower extremity veins leading to fatal pulmonary emboli.

Diane Kane · 6 days ago

"Is this the same child who purportedly died from COVID-19? If so, attributing the death to COVID-19 with no mention of the vaccine on her death certificate would constitute medical fraud — or at the very least, negligence on the part of the medical examiner."

Fraud is the correct terminology.

John Beaudoin, Sr. and Madhava Setty, MD, thank you for your hard work and dedication, gentlemen. On behalf of the children, and for the sake of truth, keep drilling down on these folks. Be relentless. Please.

Deaths are rising globally as even the most heavily vaccinated countries are seeing death rates like they've never seen before, and yet call these deaths "covid" deaths and keep pushing the jab. Depopulation is the most likely reason for what we're seeing. Eugenics has been with us for a long time, but even the most staunch eugenicist knows they can't just kill people outright. And even with the toxic jab, they couldn't have people dropping dead by the hundreds in the streets. So, they worked out something that destroys the immune system, making people vulnerable to dozens -- more than 100 actually -- of "side effects" of the vax, so that people die of all kinds of illnesses and disease. Turbo-cancer is one of the biggies currently. I've know several people personally who got turbo-cancer and were dead within days of diagnosis. Heart attacks are another cause of the death of nearly a dozen people I've known personally.
Barbara Marx Hubbard, American futurist and at one time President of the Foundation for Conscious Evolution, was a eugenicist (she died in 2019 at age 90) said: "One fourth of humanity must be eliminated from the social body. We are in charge of God's selection process for planet Earth. He selects, we destroy. We are the riders of the pale horse, Death."
That's the kind of thinking we are up against, my friends. We must be on guard and ready to defend the human race.

Stupid Bitch · 8 days ago

From the beginning, the "Plandemic" had one goal. The shot. This is a WEF, Bill Gates, etc. depopulation bomb. Don't take the shot. If you took the shot, don't take the boosters. They are killing us plain and simple.

Catherine Kellert · 10 days ago

I have a copy of an article from my local paper the Press Democrat in Sonoma County that printed actual death certificate of a 15 year old which clearly states "cardiomyopathy.. unknown etiology in the setting of recent Pfizer..." who died within 2 days of vaccination.
